**Ask about our agency discounts. Call 970-261-1334**

## **Level 1 Student Prerequisites**

1. 18 years old
2. Should be a member of a Emergency First Response group
3. Must be a good swimmer, in good health and comfortable working in the water
4. CPR / AED / O2 / First Aid Certified.

## **Qualifications of Graduates**

Awareness, Operational and Technician Level courses are for emergency response personnel who may be first on the scene of a swift water emergency. First responders at the awareness level are expected to recognize the presence of hazardous conditions, protect themselves, secure the area,

and call for additional resources, activate an emergency plan, assess conditions and attempt a reach or throw rescue, or contact rescue.

Upon successful completion of this course, divers may engage in basic public safety diving activities without direct supervision. Graduates may also participate in limited application recovery/rescue operations, providing that:

1. the PSD 1 operates under the supervision of a team supervisor
2. operations are limited to 60 feet in depth
3. operations are conducted in conditions consistent with his/her training
4. dive profiles are within no decompression limits

**\*\*This is an extremely physically demanding course and potential for injury always exist students must be in excellent physical condition and be competent swimmers. All participants will be required to have an adequate health insurance, sign waivers and provide emergency contact.**
